## Contents

Preface

List of Authors and Coauthors

Design Overview of an Asteroid Sample Return Capsule  
*Yoshifumi Inatani and Nobuo Ishii*

### High Enthalpy Flow Simulation with Ablation

Overview of Research for Prediction of Aerodynamic Heating Environment during a Super-Orbital Reentry Flight of MUSES-C Reentry Capsule  
*Takashi Abe*

Chemical Nonequilibrium Viscous Shock-Layer Analysis over Ablating Surface of Superorbital Re-Entry Capsule  
*Kojiro Suzuki, Kazuhisa Fujita and Takashi Abe*

A Thermochemical Nonequilibrium Flow around a Super Orbital Reentry Capsule with Ablation  
*Ryouji Doihara and Michio Nishida*

Influences of Transport Model on Heating Rate of Reentry Vehicles  
*Hirotaka Otsu, Kazuhisa Fujita and Takashi Abe*

### Radiation Heating Analysis

Development of a Radiation Analysis Code for Hypervelocity Reentry Applications  
*Kazuhisa Fujita and Takashi Abe*

Viscous Shock Layer Studies of a Super Orbital Reentry Capsule Using a Multi Vibrational Temperature Model  
*Ryouji Doihara and Michio Nishida*

Assessment of Forebody and Backbody Radiative Heating Rate of Hypervelocity Reentry Capsule  
*Hirotaka Otsu, Kojiro Suzuki, Kazuhisa Fujita and Takashi Abe*

### Boundary Layer Transition

Theoretical Consideration on Laminar-To-Turbulent Transitions over an Ablating Reentry Capsule  
*Kimiya Komurasaki and Graham V. Candler*

Anomalous Heating Profile over Entry Capsule with Ablation and Its Relation to Earlier Turbulent Transition  
*123*
An Experimental Study on the Boundary Layer Transition due to Gas Injection from Capsule-shape Body Surface

Tetsuya Yamada, Hiroyuki Ogawa, Satoshi Nonaka, Yoshifumi Inatani, Kazuyuki Nakakita and Takashi Yamazaki

Hypersonic Ground-Based Experimentation and Test Technique

Arc Heating Facility and Test Technique for Planetary Entry Missions

Tetsuya Yamada and Yoshifumi Inatani

Utilization of Expansion Tube for MUSES-C Reentry Simulation

Akihiro Sasoh, Hirotaka Otsu, Takashi Abe, Keisuke Sawada and Hiroyasu Mizuno

Experimental Study of Nonequilibrium Phenomena behind Shock Waves Generated in Super-orbital Reentry Flight

Takashi Abe, Atsushi Matsuda, Kazuhisa Fujita and Shunichi Sato

Pressure- and Temperature-Sensitive Paint Measurements in Shock Tunnel

Yoshiaki Nakamura and Mitsuru Kurita

Ablative Thermal Protection, Thermal Response Characterization, and Integrated Simulation Technique

Thermal Responses of Ablator for Reentry Capsules with Superorbital Velocity

Tetsuya Yamada, Yoshifumi Inatani and Ken'ichi Hirai

Trajectory-based Coupled Analysis of Viscous Shock Layer and Charring Material Ablation at Stagnation Point

Kojiro Suzuki

An Integrated Numerical Method for Predicting Aerodynamic Heating Environment for MUSES-C Entry Capsule with Ablation

Keisuke Sawada

Thermal Protection System of the Reentry Capsule with Superorbital Velocity

Tetsuya Yamada, Nobuaki Ishii, Yoshifumi Inatani and Masahisa Honda

Aerodynamics of Reentry Capsule

Transonic Dynamic Instability of disk-shaped Capsule

Koju Hiraki

Numerical Analysis of Dynamic Instability at Transonic Speeds

Susumu Teramoto, Kozo Fujii and Koju Hiraki

Study for Dynamically Unstable Motion of Reentry Capsule

Takashi Abe, Syunichi Sato, Yutaka Matsukawa, Kazushi Yamamoto and Kazumi Hiraoka
Rarefied Aerodynamics of MUSES-C Sample Reentry Capsule

Kazuhisa Fujita, Yoshifumi Inatani Koju Hiraki and Takashi Abe

The Aerodynamic Database for Asteroid Sample Return Capsule

Koju Hiraki and Yoshifumi Inatani

333

Capsule System Analysis and Reentry Flight Scenario

A Unique Single Stage Parachute System and Qualification by Balloon Drop Tests

Nobuaki Ishii, Koju Hiraki, Yoshifumi Inatani, and Masahisa Honda

Attitude Motion and Aerodynamic Characteristics of MUSES-C Reentry Capsule

Nobuaki Ishii, Koju Hiraki and Yoshifumi Inatani

System Description and Reentry Operation Scenario of MUSES-C Reentry Capsule

Nobuaki Ishii, Koju Hiraki, Tetsuya Yamada, Yoshifumi Inatani, and Masahisa Honda
